The Nugget is California's Leading Mining Weekly

Nevada City Nugget

Thomas F. Hogan, prominent local business man passed away just before noon today after a lingering iilness. of some months.

VOLUME II· NUMBER 29 THE GOLD CENTER NEVADA CITY, NEVADA COUNTY, CALIFORNIA. THE COUNTY SEAT PAPER JUNE 4, 1928

RISING SUN MINE UNWATERING IS NOW COMPLETED

The workings of the Rising Sun property on Bear river have been drained of water the past few days with the tapping through of a large drill hole to a raise above the 600 level. The gas is still heavy in the old workings and as soon as this is cleared out, development work will be started. The shaft is being repaired at the present time.

A 130 ton modern amalgamation mill with a 200 ton cyanide plant is being installed. The Rising Sun was a large producer until the excessive flow of water rendered unprofitable mining on the lower levels. The work of draining the property down to the drain tunnel level means a new era of production for this property.

The main tunnel was completed in February but the connections were not made with the old workings until the past week. The old orebody in the west end of the mine which was lost in the early days through faulting was picked up in the tunnel and a rich ore shoot opened up. Four ledges were cut during the driving of the tunnel which contain good milling rock. With the new ten stamps added to the former ten stamp equipment and a Chilean mill for fine regrinding will give ample milling capacity. The cyanide plant will treat the tailings from the mill and accumulated tailings from the old dump.

The Nevada Mining Press in its issue pays Edward C. Uren a well deserved compliment: "The tunnel was surveyed and laid out by E. C. Uren of Nevada City, and so well was the work done that, although separated by 500 vertical feet of water, the connection was made with only the variation of a few inches."

E. C. Klinker is in charge of operations.

GOOD PROSPECT FOUND IN THE FINNEY MINE

Pannings from a recent strike in the Finney mine near Downieville show assay values running from $20 to $30 per ton according to Manager J. H. Collier who is in charge of operations at this property near Downieville. A 16 inch vein was picked up in the footwall and has been followed for some distance. The tunnel is now in 800 feet.

TELEPHONE DIRECTORY FOR JUNE IS NOW OUT

The new June directories of the Pacific Telephone and Telepgraph Company are now being delivered to Nevada City subscribers and the number given out, 550, for this exchange shows a steady and continuous growth. The style of makeup has been changed in the present issue, the outside exchanges being placed in the front and the Sacramento directory to the rear. The classified section and the business and bureau guide will be found of interest.

Any patron not receiving their copy by June 10th ,should notify the central office.

Wm. Litchenberger was in town Friday from the Brush Creek Mine having some machinery repaired at the Miner's Foundry.

T. B. Williamson who is operating a copper mine at Island Mountain in Trinity county has been visiting his brother R. Foster Williamson of Washington.

Mr. and Mrs. R. A. Barnes are at home after a visit in Sacramento.

Mrs. F. Davies and three sons, Lionel, Alton and Craig decorated the graves of loved ones at Forest Hill on Memorial Day.

Mrs. Annie Hill entertained Edward Gray and son, Edward Jr., and the latter's fiancee, Miss Ellen Whitlock, all of Oakland. The Grays are former resident and enjoyed spending Memorial Day renewing old acquaintances.

Miles Coughlin is home after a quick trip to Oakland.

R. D. Stenger and daughter, Lenore returned home Wednesday from Oakland where they visited Robert Stenger, Jr., who was recently operated upon for appendicitis.

BIG MINING OPERATIONS ASSURED IN SALE OF THE GASTON PROPERTIES RESCUE EULA COMPANY SIGNS PAPERS FRIDAY AND WILL START AT ONCE

General Manager O. E. Schiffner Is On The Ground To Direct Operations Following Extensive Sampling; Electric Power Will Be Brought In And New Equipment Installed

One of the largest transfers of mining properties in Nevada County for a number of years, and which was exclusively forecast in The Nugget of last week, was accomplished on Friday when the papers transferring the extensive Gaston Ridge properties lying between Washington and Graniteville wer esigned by the Rescue Eula Mining Company of Nevada which is preparing to open up development on a large scale at once. Electric power lines areto be brought to the property as soon as possible.

This company which has a record of twenty four years of production at Tonopah has been making a thorough examination of the mining fields between Arizona and Oregon for the past nine months and the excellent showing made in the sampling of the Gaston properties caused it to select this section as the scene of its major operations. General Manager Otto E. Schiffner has been making his headquarters in Nevada City for some weks past and will open offices here at once and will bring his family here to reside.

The Rescue Eula Mining Company is a corporation organized under the laws of the State of Nevada and has a permit from the California Commissioner of Corporations to operate in California. It is amply financed and has no stock to sell. Sam Shannon of San Francisco is president and George Searle of San Francisco is secretary. Among the directors are Messrs. W. H. Hannon, F. W. Monahan, Parker and McGinnis. O. E. Schiffner is general manager and will be in active charge of operations.

SAMPLING SHOWS PROPERTY TO HAVE UNUSUAL MERIT

A thorough sampling of the Gaston properties has been made with the idea of checking up on the report of the engineers of the company and it was found that the mine values show the property to be one of unusual merit. The large structure which prevails points to future possibilities in opening up new orebodies on the strike on the vein in impressive fashion. The executives of the Rescue Company believe that in the Gaston holdings there is an excellent opportunity for the development of a big mine.

Speaking of the immediate district surrounding the Gaston mines, the possibilities of development in several of the close by properties have been accentuated by the present developments. Due to the fact that the drain tunnel on the Gaston Ridge mines intercepts the vein system 1900 feet below its outcrop, the possibility of utilizing this drain tunnel for developing several adjacent properties is a very attractive mining posibility.

OPERATIONS SCHEDULED TO BEGIN AT ONCE

Operations at the Gaston are to start as once as soon as a crew can be assembled and necessary equipment installed. Negotiations are now pending with several companies owning property in the vicinity looking toward the installation of electric power. The Pacific Gas and Electric Company has several men in the field working out a logical plan for the entry of electric power into the Gaston section. The present equipment is to be thoroughly overhauled and added to.

The tunnel is to be retimbered and put into working condition. Suitabie houses will be erected for the employes and a complete camp equipment is being sought by general manager Schiffner. The necessary machinery will be installed with the object of starting mining operations as soon as posisble.

Otto E. Schiffner, the general manager, has had a long experience in a number of mining ventures in Montana, Nevada and Southern California. He is highly pleased with the prospects for large time operations on the Gaston Ridge. The deal closed Friday forecasts greatly improved increased interest in Nevada County mining operations which has come to the front so fast already this year and are making this and Sierra County the banner mining section of the state.

The first authentic report on the Gaston group of properties which lie between Washington and Graniteville is found in a state mining bureau report issued in 1888 at which time the Gaston Ridge mine, locally known as the California, had been developed to a depth of 147 feet by a 600 foot tunnel and another tunnel 100 feet below. A 10 stamp mill had recovered $45,000 from August 12, 1887 to June 14, 1888. From 1888 to 1898 the Gaston mine was worked intermittently, but by the latter year the vein had been worked to a depth of 275 feet.

In 1898 the Gaston Gold Mining Company began active operations. A main adit was started 400 feet below the upper workings and in 1900 at a distance of 2000 feet it intersected the Gaston vein. This tunnel was continued 600 feet into the hanging wall where in 1901 the Gambrinus vein was encountered. Later, a winze was sunk on the Gaston vein, and some of the best ore that the mine produced was taken out from below the adit level. In the eight years from 1899 to 1907 the production was approximately a million dollars from 174,000 tons of ore stoped from both the Gaston and Gambrinus veins. In 1905 a campaign of energetic development was inaugurated and new equipment at a cost of $50,000 was ordered. A drain tunnel was started 800 vertically below the main adit but owing to the San Francisco fire it was found impossible to secure capital to carry out the extensive plans for improvement. All development work was suspended, the ore in sight was stoped, and the mine was closed temporarily in 1906. In 1908 work was resumed and the drain tunnel was driven a distance of 4500 feet to the Gaston veins. A raise was put through connecting the drain tunnel and the bottom of the winze 500 feet above. After ten stamps of the 40 stamp mill had been removed to the lower tunnel and run on ore from the lower levels, the mine was closed in the fall of 1913. Work was again resumed in the spring of 1914 and was intermittently operated after that time.

The property owned by the Gaston company consists of 1200 acres of which 1100 are patented including 26 mining claims. There are eight separate and distinct veins on the property but only two, the Gaston and Gambrinus, have been worked.

The properties included in the transfer are the following:

Gaston Ridge Consolidated Mine embracing Yale, Gaston Ridge, Gaston Ridge North Extension, Burns, Burns North Extension, West Burns, Baltimore and Southern Extension California Quartz Mines, Gambrinus Quartz Mine and Gambrinus mill site, Solace Quartz Mine, Gambrinus North Extension, U. S. Tunnel No. 1, Tunnel No. 2, Tunnel No. 3, and Gamgast Quartz Mining Claims;

Mrs. William Hutchinson had as guests this week, Mrs. Joseph Pollard and daughter, Mrs. A. E. Walton, of Oakland.

Mr. and Mrs. C. W Towle of Marysville attended the funeral of his mother which was held here Thursday.

Mrs. W. P. Sawyer has as a guest, Mrs. Belle Powell, a former resident.

Miss Lillian Nevis and brother, Albert of Yuba City spent Sunday here renewing olda cquaintances.

Mrs. Mary Rossen entertained her son,Raymond, and wife of San Francisco over the wek-end.

CAMPTONVILLE MINING HAS WATER SHORTAGE

The running season for mining depending upon water is shortening as these hot summer days are lowering the water, and the "piping season" of the hydraulic mines is almost over. The Bald Top, the highest elevated of the local hydraulic mines cut down its crew several weeks ago, and is now doing repair work, and other work which must be done during the dry season. Fred E. Aldous, superintendent of the property, is at present at Los Angeles, expected back at any time to continue the work, a small crew is at the property at all times.

The Joubert mines pipes only a few hours each day, and unless some more precipitation falls soon, the water will soon be gone, and the work of getting things in order for next season will start.

The busiest property at the present time in the Camptonville section is the Halkyard gravel property seven miles north of town. The mine is in charge of the B. F. McNaught & Co., Los Angeles people, and a small village of people live at the mine, making a happy group, and bringing that section to the front once again. They are pushing the tunnel ahead in search of the main channel which is expect to be reached most anytime. Old timers say that this is one of the best properties in this mining district. It is located in a gold producing area for even the ladies of the camp are able to pan free gold from the surface of nearby ravines. Mrs. Baldwin, who handles the pan well, has succeeded in getting considerable free gold from the nearby ravines, getting two nuggets as large as a brown bean, which speaks well of the country where the property is located.

The non operation of the Snowden Hill property is the result of a stock selling speculative scheme last year of a Los Angeles combine which took the mine only to profit from the sale of stock and interest in the same. They ran it on a luxuriant style for a short time when a final blowup came, and since that time the owners of the property have been in court in order to eradicate the lease from the mine. The trial is on the calendar of the Sierra County Superior Court, and as soon as it is over and the matter settled, there is no doubt but what the property will be opened again, but no one will operate it while in litigation.

Henry Rabe is going ahead with his property near the Sleighville House. He has some very good quartz and the outlook is good for finding something better, in which event he will erect a small mill to handle the rock.

Considerable prospecting has been done in the Camptonville field this spring, and several new mining locations have been filed. Several pocket hunters have been scouting in the in the nearby ravines, and while they may not have found anything big, yet they have found enough to encourage them to locate.

WASHINGTON ROAD TO HAVE MUCH NEEDED CHANGES

It will be good news to the many people who travel the Washington road that Supervisor Dudley is planning on building a new road from Junction House to Washington in the near future. It will cut out several bad stretches of road and also leave out some steep grades. The road will go through the Fowler saw mill property, from which rights of way have been purchased. Some of the old mill roads will be used with about 1000 feet of new road to be constructed.

John Marks is at home after some time spent around Folsom.

Mr. and Mrs. James Cairns have returned to their home at Palo Alto after a pleasant visit here with Mr. and Mrs. W. G. Richards.

W. M. Kane of Downieville, who recently broke his wrist, was in town Friday and is recovering fast from his injury. He was accompanied by P. W. Smith, who was here on business.

Mrs. Ed Schmidt left this week for a visit with relatives in San Francisco.

KENNEBEC PROPERTY TO BE OPERATED SHORTLY

The Kennebec mine above Edwards Crossing owned by the Paine Brothers is about to be developed with the completion of financing arrangements which have been pending for some time. This property is one of the promising ones of the district and should make an excellent production record with the installation of milling facilities.

BRUSH CREEK MILL WILL SOON BE ON FULL TIME

The stamps are again dropping at the Brush Creek mine following a cessation while a new electric hoist was being installed in the shaft. The installation has been completed and development work is being pushed. Three tousand feet of air pipe has been run from the surface to the bottom of the shaft. Stoping has been started and the mill will shortly be operating three shifts.

President Ben F. Ballard of the Kate Hardy Company which is operating the Brush Creek is at the property for a time.

HIGH VALUE GRAVEL IS FOUND IN BLACK BEAR

Reports reaching Nevada City are to the effect that Hugh and Stanley McCormick who are operating the former Teleghaph gravel mine now the Black Bear near Scales have picked up a rich channel which is running almost unbelievable values per car. It is thought to be a continuation of the old Shamrock lead which was lost by the former owners. The McCormicks and Steve Dondero pumped out an old incline that was in over 1000 feet from the tunnel adit and made the strike while drifting.

GRANITEVILLE IS GETTING PEPPED ABOUT MINING

Graniteville is getting all pepped up over the great pending mining activity on the Gaston Ridge and is watching with interest prospective developments at the Ancho mine which is being sampled with a view to early operations on a large scale.

BOOM IS NOURISHED FOR NEW IRRIGATE MANAGER

Despairing of continuing the management of the Nevada Irrigation District much longer, it is reported that strong pressure is being brought to bear in Grass Valley to have Fred M. Miller succeed to the position of general manager of the District and thus perpetuate the regime which has plunged the District treasury into such severe financial straits. A meeting of the Grass Valley Chamber of Commerce has been called for this evening at which time some of the District's troubles will be aired and it is presumed the Miller boom will be formally launched.

The Nugget ventures the opinion that only a thorough house cleaning of those connected with the affairs of the District since its inception wil save the day and restore public confidence in the project.

Mrs. Charles H. Miller and son, Donald, of San Leandro are here visiting Mesdames W. P. Sawyer and W. L. Mobley for a few days. Mrs. Miller was formerly Miss Maude McKillican of North Bloomfield and is renewing old acquaintances.

Mr. and Mrs. Ed Fisk and family are at Lake Tahoe where they will spend the summer.

Rev. Father Reilley spent Memorial Day at Sierra City visiting Mrs. Annie Spellenberg, who suffered a stroke of paralysis Sunday. She is reported as somewhat better.

The many friends of Miss Ruth Arbogast will be pleased to learn that she is rapidly recovering from a recent operation for appendicitic at the lacal sanitarium.

HI GRADE STRIKE MADE IN ARCTIC MINE PAST WEEK

Superintendent Martin Vanberg of the Arctic mine was in town yesterday, bringing with him specimens of excellent milling ore which has just been exposed in one of the Arctic tunnels.

The shoot was encountered about 700 feet in from Canyon Creek and is about two feet in width where it was encountered. The ore is unusually dark, heavy and of coarse texture, being well studded with sulphide and galena with free gold.

Crews of men are now at work at different faces on the property and development on the main Arctic ledge is being pushed ahead as rapidly as possible.

The company has recently installed an electric lighting plant of sufficient size to illuminate the grounds as well as the bulidings.

STEEP HOLLOW MINES NOW BEING DEVELOPED

Development work has been started on the Martz gravel property near Big Tunnel by the Steep Hollow Mines Company. Crosscutting operation to tap the trough of the channel are being undertaken. John Poole is in charge of operations and the project is being financed with Santa Barbara capital.

GRAY EAGLE HOLDINGS TAKEN OVER BY SELF

Riley W. Self has taken a bond and lease on the Gray Eagle mining property above Downieville from D. F. Sullivan, owner of the property. Self is acting in the interest of a well financed Nevada corporation which is expecting to take over a number of Nevada and Sierra county properties this year.

Murchie Mine Officials To Open Nevada City Office

J. M. Hoff, superintendent and V. M. Price, president, of the Murchie mine are opening a Nevada City office in the former Citizen's Bank Building which is being made ready for occupancy.

Local Masons Trek To The Coloma Doings Saturday

A number o flocal Masons trekked to the anniversary celebration at Coloma Saturday. They were headed by Past rGand Master George L. Jones and Gilbert J. Davis, Worshipful Master of Nevada Lodge. Others making the trip were John W. Darke, Atherton S. Lord, W. E. Meservey, Jos. F. Stenger, Louis W. Kopp and A. A. Willoughby.

....A grass fire called out the fire departmentat 11:30 this forenoon to put out a gras fire which had gotten ay from Mrs. Nichols opposite the Raglan Tuttle home.

Charles H. Ninnis motored to Sacramento Friday and returned with his wife who had been visiting in San Francisco and came that far by train.

George G. Morrison of Sierra City was here attending to business matters Saturday.

Three little boys suffered broken bones the last week and Dr. R. E. Werner was called in each case. Billy Sharpe fell from a trapeze in the gym at the Methodist church and fractured an arm. Bobby James, son of Mr. and Mrs. Andrew James on Wet Hill, broke his arm while at play near home; George Ebaugh, son of Mrs. Alfred Martin of Gold Flat was hit by an auto as he alighted from one in front of his own home breaking his leg.

Rev. H. H. Buckner conducted Memorial Day services at Downieville.

Mrs. Mattie Eddy is home after a visit with relatives in Sacramento.

Mrs. Richard Phillips has as her guest her niece, Mrs. Mardel Titus, a former resident.

R. L. P. Bigelow and Dr. C. W. Chapman attended the Grand Parlor of the Native Sons at Redding.

IT IS TIME FOR A HOUSE CLEANING

THE NUGGET IS STRONGLY of the opinion that a thorough house cleaning in the management of the Nevada Irrigation District is at once a prime and a crying necessity. From the early days of 1925 when the glowing words of promise were spoken, the promise of unsold bonds of a half million—yea, even a million dollars and operating surplus of as high as four millions—a district all completed and functioning splendidly, to the dismal picture of today, is a story of impending tragedy. The money is all spent or allocated, the deficit is now admitted to be around $400,000, the mountain works failing to live up to the loud advance notices, the prospect of bankruptcy facing the farmers who entered so enthusiastically into the schome of impounding the waters of upper Nevada county at the behest of a silver tongued mouther of sweet smelling phrases, and a number of which farmers still hang on his sugar coated words and still believe that he can lead them into the land of milk and honey by the magic of his mere spoken word. In no way has the management proved that it is entitled to further use of the people's rights or its future money to spend. It has frittered away the golden treasure of over seven millions of dollars and as yet District has not shown that it can effectively function and retire its bonds and interest on the proceeds from the sale of water and power. There is strong belief that the efficiency of the engineering design followed has yet to be proven as productive of maximum application of flowage and delivery to the ultimate destination.

ON THE FACE OF IT, it looks as if the people have, in plain language, been bunked. Those who fattened at the public trough should have, in the District's financial extremity offered to come forward and to have foregone their princely salaries for the time and helped rescue the people from the ruck into which they have plunged it. None, however, showed that magnanimity of high resolve which might have been expected from those who prate so long and long of their devotion to the people's cause. It is to be suspected that having milked the treasury by their methods of construction and operation they are still holding on in the hope that some miracle will happen to keep them on the payroll and let them continue to fatten their pocketbooks before migrating to fresh pastures. There seems to be none of the milk of human kindness in the breasts of the three principal actors in the NID tragedy. At least none appears evident on the surface. The tireless publicity agent of the triumvirate in his extremity calls on the civic organizations to come forward and save his fat salary for him. It is to be expected that the county farm bureau, hitherto obedient to his slightest wish, will buckle on its armor and flock to the front line trenches as it has frequently done in the past. There will be few others, if any caring to hang longer on the skirts of a discredited management and perpetuate its useless and expensive existence.

THE MANAGER, THE ENGINEER AND THE ATTORNEY, should be severed from the payroll without further ado and the District put on the minimum basis of economical operation at once. The books and the accounts from the very beginning should be thorougly audited and every penny accounted for that has been spent. If money has been spent on that ill gotten child of misery for the District, the Pacific Electric and Development Company, from District funds, its complete restitution should be forced by whatever means possible although it is a remote possibility that any salvage would be possible.

DUMPING MORE MONEY into the enterprise under the same management would be the utmost foolhardiness and would plunge the District into a financial morass from which it could never be rescued under God's green heaven. Nobody wants the bonds of an enterprise which can't make expenses. There are too many gilt edged bonds which pay a safe, conservative income and have the finest security in the world. Up until the public announcement that the people's rights, privileges and revenues had been secretly given away to the self-styled savior of the District without a penny of tangible recompense therefor, the Nevada Irrigation District looked to be a sound, financial concern, capable of meeting its just obligations, and with promise of a successful future. Since then as the mountain works have been completed with a great flourish of trumpets and much dissemination of verbiage, and then have fallen down sadly on the job of delivering the goods, it has been the tale of a toboggan toward a financial crisis and the management has the gall to try to hang on in the face of the debacle and passes the buck on whatever seems to be in range of his verbal ammunition. The plea will fall on many deaf ears that formerly were receptive. The people are apathetic, waiting for the dread blow to fall when the bondholders will step in and claim their security. The source of friction today is not in the people who are dissatisfied with the way the District's business has been handled and who wish to save the District to its rightful owners, the people. The friction is in the management itself and until the directors take a reef in their belts and get down to brass tacks and sever the tax eaters from the payroll as well as take a full inventory of the situation, there is going to be trouble and still more trouble and probable disaster.

THE PRESENT PLEA FOR SYMPATHY in this hour of trial is a clever ruse to dispossess Theodore Schwartz and Thomas Mulcahey the people's champions, as directors of the District and to replace them with two subservient tools to join the present three rubber stamps who jump at every crack of the managerial whip. The effort is futile as Schwartz and Mulcahey are stronger today in the estimation of the people than ever for the brave fight they have put up to stem the tide of the financial orgy which has been going on. It is unfortunate that two recall elections were not held at the time of the previous election and placed two real friends of the people on the board where direct action could obtain to save the day for the District and for Nevada County. Messrs. Schwartz and Mulcahey cannot be too strongly commended for their struggle to save the District to the people. They have been reviled and spit upon by the tools of the management for daring to speak their minds on the questions at issue, but they have come through clean in spite of the abuse heaped on them. If they had but one red blooded associate on the board to work with them, they could quickly accomplish something in the present crisis. We have no sympathy with those who cannot see a bright ray of hope in the situation once the decks are cleared of the wreckers who have brought this condition to pass. The District must go ahead and it will once it gets into competent hands. We have no candidates in mind for the ticklish job and it is a waste of time discussing new timber until the directors are ready to act.

GRADUATION GIFTS

Combine beauty with utility in your gift to the graduate.

We are prepared to help you do this with a large assortment of handsome, practical gifts.

And, best of all, there is always found here, something which will come within the price limit you have set.

PINE TIMBER

Wanted—10,000 acres in patches of 20 acres up.

No injury done to the growing trees—their growth is not stunted. The sap extracted is not the lifesap, but a healing secretion, protecting the tree against wounds inflicted by insects or man.

A PINE PRODUCTS INDUSTRY MEANS—Better care of trees. Additional fire protection. Clearing of brush, fallen logs and needles around trees. Constant vigilance through men employed. Steady income to farmer, workmen, merchants. Increase of property values and demand for property. Free advertising for Nevada County. WRITE TODAY. Let me come to your place and explain to you in detail. All territory within a radius of 30 miles takeni n. Leave word with the Chamber of Commerce or newspaper offices if I am out. Office at 206 Pine Street, opposite Courthouse

F. C. ERNST

JUNE DAYS ARE PERFECT SAYS FRENCH CORRALITE

FRENCH CORRAL, June2, (Special to The Nugget— "What is there, like a day in June;—
Then if ever come perfect days!" —

Yes, that is all right, if the temperature does not go above 100 degrees. We hardly know where to commence this time, so much has happened within the past week.

The wonderful time the S. J. R. W. U. A. put on for the night of May 29th and the responsive feeling shown by the public at large, for they came in crowds and from everywhere, and the good old town of North San Juan with its streets lined with autos seemed as of some pleasure resort in the City on Sunday. We feel that all are in sympathy with the Ridge people in their unhappy,—yes extreme situation on the "water question", and they appreciate our efforts and want to help us, to help ourselves. We of French Corral can speak for all our people of the San Juan Ridge, and say our heart is one and full of thankfulness for all kindness received.

We know our San Juan correspondent can give a more accurate and glowing account of this wonderful event, so we will not attempt it.

We will see who has been visiting in the past week.

H. Beresford had business in French Corral Saturday delivering a load of shakes to customers. Mr. Beresford makes a business of making shakes and posts etc., and supplies a first class article at the powest possible price.

H. Huckins of San Juan "Willow Station", had business in French Corral Sunday.

Chester P. Nichols of Nichols and Smith of Sacramento, with his brother-in-law, E. Gallup, of Woodland and his mother, Mrs. P. Nichols and sister, Mrs. B. Smith, and little son formed an auto party and spent the day with friends in French Corral Sunday. The Nichols family were former residents of French Corral.

L. Francescovich of Marysville was a visitor Monday.

Mrs. A. Bishop of Marysville was a visitor Monday. Mrs. Bishop was a former resident of this place, and never fails to observe Memorial Day for her loved ones who have their last resting place in our little "God's Acre."

A. J. Butler and son who have been visiting their friend, Thomas Meyers of this place, for the past week have returned to their home in Porterville, Calif., where Mr. Butler is in the automobile business.

Mrs. C. H. Miller and son, Donald, of San Leandro were visiting friends in French Corral and on the Ridge this week. Before her marriage Mrs. Miller was Miss Maude McKillican of North Bloomfield and was born and reared at that place. Several years ago she was married to Dr. C. H. Miller, one of the good physicians, who was located at San Juan for many years. Their early married life was spent in that place. (Oh, Yes we had resident doctors and dentists, and lawyers and all sorts of professional people in San Juan in other years when prosperity was ours. After the death of his father, who was also a physician, Dr. Miller moved to San Leandro to take up his practice.

Mrs. Wm. Provis and daughter, Mrs. Paymer, and grandson, Billie Palmer, all of San Francisco and her brothers, Frank and Albert Murphy, of Montezuma Hill, visited relatives in Franch Corral Thursday.

Memorial Day was observed in its usual quiet manner in this place. Frends and relatives went to the cemetery to place flowers on the graves of loved ones. We cannot observe the day with a parade like in many other places. But we can boast of a volunteer veteran of the Spanish war, Geo. L. Sweetland, and also one Civil War Veteran, Ernset De Prati, First Regular Cavalry California Veterans. Alas, but few of those good old veterans remain with us, but memory will ever hold them dear and will endure through all eternity.

COURT CALENDAR

Superior Judge—Raglan Tuttle.
Clerk—Frank Steel.
Bailiff—Arthur F. Hellings.
Reporter—M. D. Coughlin.

Orcetia Bagley vs. Gilbert L. Bagley. Final decree.

In re estate John W. Painter order appointing John Mulroy appraiser.

Muriel O. Fritz vs. Jos. B. Fritz. Final decree.

Thos. Sleeman vs. N. I. D. Trial June 26th.

N. I. D. vs. Am. Found. Co.—motion for change of venue.

In re Est. Aileen R. Ducotey—Decree settling final act. Dist. granted.

In re Estate James M. Hatcher contd. to 6-15.

In re Estate Caroline E. Williams Ord. confer. Sale of real estate.

In re Est. Rollin Vivian—Ord. fixing inheritance tax.

In re Est. Frank Jo Bizsak—Contd to 6 15.

In re Est. John P. Mendes—Contd. to 6 15.

Jos. Slye vs Golden Center Mg. Co. et al—Demurrers. Contd. to 6 15.

People vs. Gene Williams—E. H. Armstrong appg. for defendant—pleads not guilty. Set for trial June 14th.

Annie R. Byrne vs. J. A. Rapp et al—Default entered for ptf.

W. B. Celio vs. U. S. N. Johnson—Motion for judgment on pleadings denied. Set for trial June 5th.

Political candidates formerly showed horny fists to prove they had done manual labor, but now they have to show muscular ones which can shake hands with a great many people.

While the industrial machinery is claimed to throw people out of work, the political machinery makes more jobs.

A political plank that is wet is very liable to be slippery.

FORMER RESIDENTS ARE VISITING AT SAN JUAN

NORTH SAN JUAN, June 2, Special to The Nugget— Mrs. Bain Crawford and Ruby Thompson went to Nevada City Friday on a business trip. Mrs. H. Huckins accompanied them for the ride.

Mr. and Mrs. John Caliston and Miss Verna Phillips of Colusa were visiting friends here Saturday..

Miss Jane Nelson and mother, Mrs. Dave Conrad, of Williams paid us a visit Friday.

Mrs. Rose Pinazlia and daughters, Irma, Ruth and Claire, and sons, Lawrence and Bert, came up from Sacramento Saturday to attend the dance Saturday evening that was held there.

Mrs. Victory Reggia and daughter, Elvera, and Lester Martin and Judy Geech were visitors here also.

Mis Lucille Fogarty, a student of the Mt. St. Mary's, at Grass Valley spent the week end with her parents, Postmaster and Mrs. K. J. Fogarty.

Sam McCullough was a business visitor at Grass Valley Saturday.

Mr. and Mrs. Ray Wilde and family of Nevada City visited here Saturday.

Shebly McCormack and J. Style of Chico visited old scenes here Sunday. Mr. McCormack is a former resident.

Mr. and Mrs. C. E. Dort and daughter, Nora, and son, Erle, are visiting her parents, Mr. and Mrs. I. W. Musfield.

Mrs. William Cunningham of Celestial Valley was in town on business one day this week.

William McCullough is here on a visit to his folks for a few days.

Miss Beatrice Joyce of Sunnyvale visited friends here one day this week.

The dance held here Tuesday night was a complete success and we wish to thank all who helped or gave their assistance and we also wish to thank all who came from far and near and the surrounding little towns that attended to make the dance a success.

Chester Hanson, John and Albert Jaynes, Louie Bullington, and mother, Miss Elsie Hanson, and Mr. and Mrs. Claude Thompson and a good many more from Camptonville attended the dance Saturday evening.

Mr. and Mrs. John Gardner, Mrs. Carl Johnson were visiting here Tuesday from Alleghany.

Mrs. M. Rodgers and friends from Nevada City visited here Tuesday.

Mr. and Mrs. Bob Jones of Reno, Nevada, are staying for a few weeks on a visit renewing old acquaintances. They are former residents. Mr. Jones was born and raised here in the early days. He says he sees quite a change in the sixty years since he lived here.

Mr. and Mrs. Joe Bron of Reno were here Tuesday and Wednesday.

Evan Thomas of Downieville was in town Tuesday on a short visit.

J. R. Davis went to Nevada City and Grass Valley Thursday.

Miss Marguerite Moulton and brother, Will, and Jim LeVere of Alleghany were visiting Wednesday.

Miss Maxine Delifance of Oroville and chum, Miss Lola McBeth, were visiting friends here Thursday.

Mrs. Bain Crawford and Lester Crawford were visiting in Grass Valley Thursday.

Miss Frances Child of La Moines is the guest of her sister for a few weeks.

Mr. and Mrs. F. Wood and son, Carl, of Sweetland were here on a shopping tour one night this week.

Mrs. W. Provis and daughter, Mrs. Palmer, and her son, Billie, and Messrs. Frank and Albert Murphy visited Thursday.

Local In Management

State-Wide In Operation

The relationship between this branch of the United Bank and Trust Company and the head office is best described by the following quotation from a radio address delivered on May 2, 1928, by W F Duffy, Senior Vice-president:

"We realize fully that the resources of each branch are representative of the deposits of the community which that branch serves, and that the legitimate needs of that community must first be served For that reason, we have given our managers and advisory Boards a greater authority than a local bank could exercise in a great many instances."

CONGRESSMAN HARRY ENGELBRIGHT GIVES FINE RESUME OF MINING CONDITIONS PAST DECADE

Mr. Englebright. Mr. Speaker and Members of the House, as a member of the Committee on Mines and Mining of this House, I feel that it is my duty to bring to the attention of Congress and the American people the fact that our Government is giving but little support to the vital mining and mineral industry of the United States.

Mining, next to agriculture, is the greatest industry in its contributions to our raw materials. The value of the raw materials produced by the mining industry of this Nation amounts to over $6,000,000,000 annually and provides direct support to over 10,000,000 of our people.

Mineral development and production is no less fundamental than is agriculture. It is the use of minerals in quantity that sets off the present civilization from the primitive peoples who lived on the products of their fields and flocks. Mining is essential to the advancement of mankind and to the progress of civilization.

The wealth of the mines from the dawn of time is the epic of the song and story of human advancement, of man's march along the paths of progress. Show me a people without mines and I will show you a people deep in the mire of poverty and a thousand years behind the procession of civilization. It was the mines that made the greatness of the past; that made the ancient civilizations; that made Egypt great; that made Greece great; that made Rome great; and in modern times the mines have made England and the United States great beyond the dreams of avirice.

The very existence of present-day economic life among the more highly industrialized nations rests upon the continued production and consumption of the energy-producing minerals used as fuels, and of metals and nonmetals. It is because the free use of fuels and metals which permits the highest known production of useful goods per unit of human energy that there is in the United States and parts of Europe today the largest amount of distributable goods per capita ever known over any considerable period or erea. Abandon mining and the value of every commodity would be insignificant, humanity would sink back to the barter and exchange age. It would be the greatest calamity that ever befell the human race.

This Nation's business of mining, treating, and using minerals must be jealously protected. Our age is dominantly a mineral age. Our future national security and prosperity is largely dependent upon the future of our mineral production.

The records of mining on the American continent form by no means the least interesting chapter in its history. The expectation of finding a land possessing greater treasures of gold and silver than existed elsewhere largely led to the discovery of the New World and was the predominating motive in the first settlements of most of it. This is especially ture of South America. These golden dreams were not destined to be a disappointment, for a land had been reached whose realties of metallic wealth were capable of satisfying an almost boundless desire. Unher Spansih rule the mines of Mexico and South America poured forth their treasure of silver and gold and deluged Europe with an amount of these metals for beyond anything ever before dreamed of.

The mines of South America had been worked for nearly a century before the first settlements took place upon the shores of the north Atlantic coast in what is now the United States. The early colonists of this country, it would appear, did not direct their attention to its vast mineral wealth. They confined themselves chiefly to agricultural and mechanical pursuits.

The first to turn attention to the mineral resources of the Colonies, seems to have been Governor Winthrop, of Connecticut, who, from 1650 to 1660 was engaged at intervals in examining and prospecting various metalliferous deposits of the Connecticut Valley in the vicinity of Haddam and Middletown. In 1867 he obtained from the Government a license conferring on him unlimited power for working any mines of lead, copper, or tin, or any minerals: As animony, vitriol, black lead, alum, salt, salt-springs, or any other the like.

In 1661 he obtained another special grant for any mines he might discover at or near Middletown. It was from the researches of his grandson, John Winthrop, and amnog the specimens he collected, that the mineral columbite, was found, as, also the new metal, columbium. About the same period an argentiferous lead mine was being worked. In 1852 this mine was again opened when it was found that the shaft had been sunk to a depth of 125 feet, and that the entire excavation had extended to a length of 1,500 feet, and showed extraordinary mining ability.

In 1660 is was discovered that the region about Lake Superior possessed considerable mineral wealth, as it appears from the reports of the Jesuits settled thereabouts that some attempts were made to mine copper.

In 1700 LeSueur started to explore the Mississippi River, expressly with the view of making discoveries of the metals, and found the lead deposits in the vicinity of Dubuque, Iowa.

In 1702 the first blast furnace in the Colonies was built near the mouth of Mattakeeset Pond, in Plymouth County, Mass., by an English immigrant named Lambert Despart. Other furnaces were soon afterwards erected to work the bog ores which were abundant in the locality. About the same period, ore of similar character was discovered in Rhode Island, and blast furnaces erected. In 1715 Maryland, Virginia, and Pennsylvania followed with similar plants. These enterprises were looked upon with disfavor by the mother country and in 1719 the erection of rolling or slitting mills was forbidden by act of Parliment, which became a law in 1750.

In 1709 the first chartered mining company in the United States came into existence. The charter was issued to a company formed for the purpose of working copper ores at Simsbury, Conn. A prosperous business for several years was conducted in shipping ores to England. The success of the company seems to have led to the discovery of the same type of ore in a similar geological condition at Belleville, N. J., where the Schyled mine was developed in 1719.

In 1732 the first mine was opened in Pennysilvania, the Gap copper mine, in Lancaster County. In 1754 a successful lead mine was in operation in Wythe County, western Virginia.

Between 1750 and 1760 the New Jersey copper mines attracted considerable attention. In 1762 the cobalt mine in Chatham, Conn., was worked, and about the same time the lead mine at Southhampton, Mass., was developed. None of these enterprises seem to have been conducted with much success.

In 1774 Dubuque commenced operations in the upper Mississippi lead mines. During the early part of the nineteenth century nuggets of gold were occassionaly found in North Carolina, and from 1824 on the search for this metal was carried on there to some extent. In 1829 and 1830, however, it became quite general through the Southern States, and considerable excitement was raised on the subject. Up to this time the attempts at regular mining had been few and far between. It is true that developments had been made in various localities, but no extensive, permanent, and productive metal mines had been opened. The lead region of the West was indeed producing largely, but such was the nature of the occurrence of the ores that systematic working and large developments were not brought about.

But in the meantime the importance of our coal and iron had begun to be appreciated and their production was increasing with rapidity. In 1820 the first cargo of anthricite was sent to Philadelphia, and in 1847 our annual consumption had nearly reached 3,000,000 tons, while our production of iron was over 500,000 tons, placing us on a level with France and only inferior to Great Britain as an iron manufacturing country.

In 1844 a new region was opened to the miner around Lake Superior. Thither miners and speculators bent their steps, and after a few years of wild excitement and haphazard investments the business of copper mining became firmly established.

In 1849 the United States was electrified over the news of the discovery of gold in California. The production of gold in California in 1849, one year after Marshall's discovery, was $10,000,000; the output annually increased rapidly, and for the year 1812 the production was over $81,000,000. California's wealth of gold surpasses anything yet known to have been discovered, and which in its influence on the march of the world is to be ranked among the great events of modern times. The discovery of gold in California gave an impetus not only to searching for this metal but to mining enterprises of all kinds throughout the whole United States, and laid the foundation for the systematic and economic development of our mineral resources.

Since 1880, the beginning of complete record, the total value of the annual output of minerals in the United States has risen from about one-third of a billion dollars to over $6,000,000,000 and totals nearly $100,000,000,000.

The mineral industry of the United States employs approximately 2,200,000 workers, distributed through its different branches.

With the usual assumption of a family of five for each worker, the total number of people directly dependent on the mining industry is approximately 11,000,000. The industry has a greater importance than even these figures indicate. It is understood, of course, that the raw mineral products are rarely in a form which suits the needs of final consumers. In short, they must pass through a series of stages of production.

When the raw materials of our mines emerge from manufacture with the added expenditure of labor and capital upon them, they have a wholesale value of over $22,000,000,000.

In this the second stage of application, the mineral products give employment to an additional two and a half million workers and support to about twelve and a half million more people.

A large portion of these manufactured commodities must filter through the retail trade; and from this distribution arises the support of many more millions of our population.

The raw materials from the mines supply 52 per cent of the freight carried by the class A railroads of the United States, and with the products of first stages of manufacture, 68 per cent.

It is estimated that the products of the mineral industry when they reach the consumer with transportation, manufacturing, and distribution costs added, have about the same value as the products of agriculture—each then thus contributing about one-quarter of the total value of all of our national products.

The Unted States is more nearly self-sustaining in regard to mineral commodities as a whole than any

WILSON IMPROVES LOG CABIN PAVILION FLOOR

LOG CABIN, June 2, (Special to The Nugget— Mr. and Mrs. W. Wernse of San Francisco, who have a cottage at the Log Cabin are spending a few weeks visiting and enjoying a rest away from the noisy city.

Mr. Wilson and Mr. Wernse made a flying trip last Friday to San Francisco in Wilsons truck for a load of furniture for Mrs. Wernse's cottage.

Mr. Wilson has just finished relaying a new floor on his dance pavilion which is the largest in this section of the county being 3000 square feet. He will hold his first dance June 9 and then every two weeks. The Blue Bird Orchestra of Marysville will play for the first dance.

CAMPTONVILLE SAWMILLS ARE STARTING SEASON'S RUNS

CAMPTONVILLE, June 2, (Special to The Nugget)— The local saw mills are preparing for a busy season and are getting things in shape for an early start. Schmidt Bros. have been getting their mill in order for the past month, and alerady have a crew falling timber. The Oak Valley Lumber Company, under the management of William O. Grant, expects to cut considerable lumber this season, and a small crew are getting things in shape for the start. Pendolas Mill is also getting into line, and within a short time the natural sound of saw and axe, donkey and mill whistle will bring back the familiar summer work in the high timber.

The local mills cut a large amount each year, usually supplying several contracts for the Pacific Gas & Electric Company for their flume repair and other construction work. Aside from this they supply much lumber and heavy timbers to several of the local and nearby mines. They cut a fine grade of lumber and it is shipped many places for various uses. There is a large amount of timber in this vicinity and it will require a long time to make an impression in it, and by that time the next growth will be ready.

The three pet skunks evidently scented the fact that their presence beneath the local postoffice was not wanted; so, one by one, they came from their hiding place, only to be captured by some of the local boys who displayed them in the street for some time, considerably to the interest of several townspeople.

A traveling show man happened along up the highway and was only too happy to get the litlte animals, taking them with him, thus saving someone's hen house from a future looting.

Modern life is said to produce a tremendous nerve strain, but the nerve of the politicians. anvassers, solicitors, etc., is usually equal to the same.

Don't trace your ancestry back too far. You might find one of them swinging on a limb by his tail.

N. C. N. G. R. R. COMPANY TIME TABLE AND RATES

Effective Sunday, Sept. 25, 1927

Train leaves Nevada City at 5:20 a. m., Grass Valley at 5:50 a. m., arriving San Francisco, 1:30 p. m.

Train leaves Nevada City at 11:00 a. m., Grass Valley 11.25 a. m. making direct connection with S. P. Train 23 arriving at San Francisco 5:10 p. m.

Train leaves Nevada City at 4:40 p. m., Gras sValley 5:05 p. m., making direct connection with S. P. Train 40 leaving San Francisco at 1 p. m., enabling passengers to arrive at Grass Valley 7:35 p. m. and Nevada City, 7:56 p. m.

NEVADA CITY ASSAY & REFINING OFFICE
E. J. N. Ott, Proprietor

Practical mining tests from 25 to 1000 pounds, giving the free gold percentage of sulphurets, value of sulphurets, value of sulphurets and values of tailings.

Assays made for gold, silver, lead and copper. Mail order check work promptly attended to. Agent for New York-California Underwriters, Westchester and Capital of California Fire Insurances companies. Also automobile insurance.

HAVE YOUR PRINTING DONE IN NEVADA CITY

Help build up a local industry and keep your money in circulation at home. The prices are no higher. The service is satisfying both as regards quality and time taken to get it out. There is no occasion to send your orders to be done out of town.

Our printing plant is run by people who live in our own community who spend their money here. The Nugget has a modern plant for the expeditious handling of all kinds of commercial printing. The best of paper and ink used in our work.

You can get anything in printing from this shop—from a menu card to a large poster—letter heads, bill heads, statements, booklets, shipping tags, programs, business and calling cards. Let us do your next work.

Engelbright Gives Comprehensive Survey of Mining

Continued from previous page

other country on the globe.

That the mining industry might have adequate scientific aid, this Government founded in 1879 the United States Geological Survey and in 1910 the Bureau of Mines. These departments have repaid manyfold the funds expended in their support. They have performed valuable pioneer work, which has returned millions and millions of dollars to Government and industry. No branch of Federal activity has yielded more direct beneficial results than the Geological Survey and the Bureau of Mines.

The basic subjects of the Geological Survey's investigations and the material upon which the minnig industry is founded are one and the same thing—the earth and the minerals that come out of it.

The investigations of the geologic branch touch directly the heart of the mining industry. Mining which has to deal with geologic formations, deposits, and structures, is obviously dependent on geologic study for the solution of some of its fundamental problems. These problems extend for beyond the limits of a single mine and can be solved only by the study of an entire district, or even of a region including several districts. The topographic branch has charge of the making of the topographic map of the United States. The activities of the conservation branch are directed toward the wise development and use of the vast, but still imperfectly known, mineral resources of the public domain. The water-resources branch studies the ground waters, and conducts the measurement of stream flow. The section of nonmetals and of fuels conducts investigations that contribute to the discovery and mining of such deposits as phosphate, potash, cement materials, gypsum, asbestos, coal, petroleum, and oil shale. The sections of petrology and of paleontology and the division of chemistry and physics makes studies and analyses that are of basic importance and assistance.

The purposes of the Bureau of Mines as set forth by Director Scott Turner are as follows: The service rendered by the Bureau of Mines to the Nation's great mineral industry lies within the broad fields of endeavor; conservation of the life and health of the million miners and quarrymen and the million or so workers in the metallurgical and petroleum industries; and the efficient production and utilization of the minerals which these millions of men labor to exploit for the comfort and welfare of mankind.

The Bureau of Mines was established to investigate the technology of the mining, treatment, and utilization of mineral substances; also to improve health condition s and increase safety amongst th eworkers; to increase efficiency and economic development and reduce the element of waste in the mining and metallurgical industries. The bureau's work of testing machinery, fuels, and explosives; on betterment of working conditions in mines and training in first-aid mine rescue work, and on improving metallurgical and mining methods, has been of great fundamental importance to the industry.

To sum up briefly the activities of the two departments with their relation to the mineral industry, it might be stated that the Geological Survey is charged with the discovery, development, and conservation of our mineral resources, and the Bureau of Mines charged with effecting the maximum recovery of value.

As heretofore stated, since 1880 the value of the annual production of minerals in this country has increased from about one-third of a billion dollars to over $6,000,000,000, and totals almost $100,000,000,000. This eighteenfold increase is divided unevenly as between the metallic and nonmetallic products. The value of the metallic products increased about sevenfold and of the nonmetallic products thirty-five fold. The individual mineral industries disclose wide differences of growth and some have and are rapidly declining.

To be concluded next week

LEGAL NOTICE

SUMMONS
No. 5613

IN THE SUPERIOR COURT OF THE STATE OF CALIFORNIA, IN AND FOR THE COUNTY OF NEVADA.

GEORGE W. COOPER, Plaintiff vs A. R. WADSWORTH, FRANCIS STEVENS, JANE STEVENS, his wife, and also all other persons unknown, claiming any right, title, estate, lien or interest in the real property described in the complaint, adverse to plaintiff's ownership, or any cloud upon plaintiff's title thereto. Defendants.

Action brought in the Superior Court of the State of California, in and for the County of Nevada, and the complaint filed in the office of the Clerk of said County of Nevada.

NILON & NILON,
Attorneys for Plaintiff

THE PEOPLE OF THE STATE OF CALIFORNIA SEND GREETING TO A. R. WADSWORTH, FRANCIS STEVENS, JANE STEVENS, his wife, and also all other persons unknown, claiming any right, title estate, lien or interest in the real property described in the complaint adverse to plaintiff's ownership, or any cloud upon plaintiff's title thereto, Defendants:

You are hereby directed to appear and answer the complaint in an action entitled as above, brought against you in the Superior Court of the State of California, in and for the County of Nevada, within ten (10) days after service on you of this Summons—if served within this County; or within thirty (30) days if served elsewhere.

And you are hereby notified that unles you appear and answer as above required, the said plaintiff will take judgment for any money or damages demanded in the complaint, as arising upon contract, or he will apply to the Court for any other relief demanded in the complaint.

The object of the action is to determine all and every claim, estate, right, title, lien or interest in the real property hereinafter described, adverse to plaintiff's ownership, or any cloud upon plaintiff's title thereto; to obtain a judgment of this Court adjudging and decreeing that plaintiff is now, and has, by himself and his predecessors in interest been, in the actual, exclusive and adverse possession of said real property continuously for the period of twenty (20) years immediately prior to the filing of the complaint in this action, claiming to own the same in fee against the whole world; and that plaintiff has paid all taxes of every kind levied or assessed against said real property during the period of five (5) years next preceding the filing of the complaint aforesaid; that plaintiff is the owner and entitled to the possession of said real property, and that all claims of said defendants thereto are without right, and that they have not, nor has any, or either of them, any right, title, estate or interest in said real property, or any portion thereof.

The real property affected by this action and hereinbefore referred to is described as follows:

All that certain real property situate, lying and being in the City of Nevada, County of Nevada, State of California, and particularly described as follows:

Lot Number Seven (7) of Block Number Twenty-five (25) of the City of Nevada, as said lot and block are designated upon the official map of said City of Nevada made by H. S. Bradley in the year 1869.

Given under my hand and the Seal of said Superior Court of the State of California, in and for the County of Nevada, this 22d day of March, 1928.

GEORGE COUGHLAN,
Clerk.
By R. N. McCORMACK,
(SEAL) Deputy Clerk.

PERSONAL MENTION

Dr. and Mrs. Robert Werner were Sacramento visitors Fridayafternoon.

George Neagle, Jr., was up from Oakland for the week-end. He was sporting a minature baseball diamond on his upper lip that was the cynosure of admiring glances.

Mr. and Mrs. W. G. Robson of Wheatland were here on business early last week.

J. A. McLaughlin, superintendent of the Tonopah-Hasbrouck mine at Tonopah, Nev., has been spending a few days at the Western Merger mine.

N. Hartung was here from Smartsville on business last week.

D. R. Hutchison was up from Berkeley last week to visit his parents, Mr. and Mrs. J. H. Hutchison.

W. M. Chace of San Pedro was here Friday visiting friends. He was on his way home after a visit with his brother-in-law, Joe Koeninberg, at the Indian Hill mine.

Mr. and Mrs. James Penrose have as a guest, Miss Zueline Tibbetts of Reno.

Mr. and Mrs. D. D. Finley of Pine Grove are spending some time in our Nevada City.

Mrs. Joe Northey of Rosevill was visiting friends here Friday.

B. Angiolini motored to Sacramento Sunday morning and returned with his sister who spent the day here with her parents. The young lady is in the employ of the United Security Trust and Savings Bank of that city.

Mr. and Mrs. M. P. Stone of Berkeley were arrivals here Friday. He is a past master of Madison Lodge and attended the Diamond Jubilee which was held Saturday evening.

Harry Thomas of Denver, Colorado spent a few days this week at the home of his aunt, Mrs. Alice Martin. He is on a tour of the Pacific coast states.

LEGAL NOTICE

NOTICE

Under Sec. 3897, P. C.
CONTROLLER'S DEPARTMENT
STATE OF CALIFORNIA.

To the Tax Collector of the County of Nevada, State of California:

WHEREAS, a deed or deeds conveying to the people of the State of California the title to the property hereinafter described having heretofore been filed in the Controller's office of the State of California;

AND, WHEREAS, said deed or deeds recite the fact that said property hereinafter described was sold to the people of the State of California for the non-payment of State and county taxes;

AND, WHEREAS, five years have elapsed since the date of said sale, and no redemption, according to law, has been made of said property, or any part thereof;

NOW, THEREFORE, in pursuance of the law in such case made and provided, I, RAY L. RILEY, Controller of the State of California, by virtue of the authority in me vested by the laws of this State, do by these presents authorize, empower, and direct you, the said Tax Collector, to sell at public auction, in separate lots or parcels, the property hereinafter described.

The property above referred to, and hereby authorized to be sold, is situate, lying and being in the County of Nevada, State of California, bounded and particularly described as follows, to wit:

Property sold to the State, June 27th, 1905, for the delinquent taxes of 1904:

W½ of SW¼, SE¼ of SW¼ and W½ of NE¼ of SW¼ (less 54 acres to Hegarty of Sec. 13, Tp. 18 N., R. 10 E., Mt. D. B. & M. 86 acres.)

SW¼ Lots 6 and 7 and S½ of NW¼ (all patented) Sec. 24., Tp. 18 N., R. 10 E., Mt. D. B. & M. 318 acres.

No bid shall be received or accepted at such sale for less than the amount of all the taxes levied upon such property, and all costs and penalties for every year delinquent as shown by the delinquent rolls for said years and also all tax liens up to the date of the execution of the deed to the State, together with interest at seven per cent per annum and also the graduate redemption penalties required under Section 3817 of Political Code computed upon the aggregate amount of the taxes for each of said years from the first day of July following delinquency to the date of the sale hereunder and all expenses accrued to the date of the sale under this authorization.

Said sale shall be conducted in all respects as provided by law governing such sales.

Given under my hand and seal of office at Sacramento, this 14th day of May, A. D., 1928.

RAY L. RILEY,
[SEAL] Controller
By C. E. Cooper, Deputy

Sale of Real Estate by Authorization of Controller.

Under Section 3897 of the Political Code.

Date of Sale—June 14th, 1928.

ESTIMATE of amount required to purchase the within described Real Estate, which was sold to the State on the 27th of June, 1905, for the delinquent taxes of 1904, Deeded to State July 12, 1910, Assessed to Unknown Owners.

DESCRIPTION OF REAL ESTATE:

W½ of SW¼, SE¼ of SW¼ and W½ of NE¼ of SW¼ (less 54 acres to Hegarty) of Sec. 13, Twp. 18 N., R. 10 E. 86 acres.

SW¼ Lots 6 and 7 and S½ of NW¼ (all patented) of Sec. 24, Twp. 18N., R. 10 E. M. D. B. & M. 318 acres.

Sold to State June 27, 1905; Tax Deed No. 85, for taxes of 1904.

1904 Assessed to Unknown Owners—

Taxes of 1904	$20.16	
Penalties on Delinquent Roll	2.52	
Costs on Delinquent Roll	1.00	
Interest at 7 per cent per annnum from July 1st, 1905	32.41	
50 per cent graduated Penalty	10.08	66.17
Total taxes		$ 20.16
Total special school or other taxes		.00
Total penalties on delinquency (15-5 and 5 per cent)		2.52
Total costs		1.00
Total interest		32.41
Total graduated penalties		10.08
Cost of registering notice and postage		.20
Cost of advertising this notice		50.00
Least amount for which property can be purchased		$116.37

Therefore, in pursuance of law public notice is hereby given that I will on Thursday, the 14th day of June, 1928, at the hour of 10 o'clock A. M., in the Nevada County Tax Collector's Office, Courthouse, in the City of Nevada, County of Nevada, State of California, sell at public auction, in one parcel to the highest bidder or bidders, in cash, lawful money of the United States, the said property, hereinbefore described and particularly described in the foregoing Controller's authorization, to which reference is hereby made for the purposes of description; all of said real property is situate, lying and being in the County of Nevada, State of California, and further described in said Tax Deed to the State of California above referred to.

No bid will be received or accepted at such sale for less than the amount of all taxes levied upon each parcel of property and all the costs and penalties for every year delinquent, as shown by the delinquent rolls to date of execution of the deeds to the State of California, and all expenses accruing to the date of the sale, together with interest at the rate of seven per cent per annum, and also the graduate redemption penalties under Section 3817 of the Political Code from the first day of July following the delinquency of each of said years to the date of sale hereunder computed on the aggregate amount of such delinquent taxes, and all expenses accrued to the date of the sale under this authorization.

Given under my hand at the City of Nevada, County of Nevada, State of California, this 18th day of May, 1928.

FRANK STEEL,
Tax Collector of the County of Nevada, State of California.

First Publication—May 21, 1928.
Dates of Publication—May 21, 28, June 4, 1928.

NOTICE OF COMMISSIONER'S SALE OF REAL ESTATE ON FORECLOSURE OF MORTGAGE

No. 5570

IN THE SUPERIOR COURT OF THE STATE OF CALIFORNIA, IN AND FOR THE COUNTY OF NEVADA.

A. R. ARCHIBALD, WILLIAM V. ANDERSON, GEORGE SHIRKEY, S. D. STOUFER, GRACE D. ARCHIBALD, JOSEPH D. ARCHIBALD and R. F. D. LEMON, as Trustees doing business under the name of the NEW ENGLAND CONSOLIDATED MINES, Plaintiffs

vs

WESTERN MINES CONSOLIDATED, INC., a corporation, Defendant.

Under and by virtue of an order of sale and decree of foreclosure and sale, issued out of the Superior Court of the State of California, in and for the County of Nevada, on the 21st day of May, 1928, in the above entitled action, wherein the above named plaintiffs obtained judgment and decree on the 4th day of May, 1928, which said judgment and decree was on the 4th day of May, 1928, entered and recorded in Judgment Book 7, at Page 418 et seq., (to which judgment and decree reference is hereby made), I am commanded to sell at public auction all the following described premises, situate, lying and being in the County of Nevada, State of California, and described as follows, to-wit:

All those certain mining claims and properties situate, lying and being in the County of Nevada, State of California, and bounded and particularly described as follows, to-wit:

The Norambague Quartz Mine, patented, being designated as Lot Forty-one (41) of Sections eleven (11) Fourteen (14) and Fifteen (15), Township Fifteen (15) North, Range eight (8) East, M. D. M., said land being more particularly described in the patent thereto recorded in Book 45 of Deeds, page 379 et seq., Nevada County Records, to which reference is hereby made.

Also the Norambague No. 2 Quartz Lode Mining Claim, patented, designated by the Surveyor General as Lot No. ninety-nine (99), embracing a portion of Section eleven (11), Township fifteen (15) North, Range eight (8) East, M. D. M., said land being more particularly described in the patent theretofore recorded in Book 3 of Patents, page 404 et seq., Nevada County Records, to which reference is hereby made, except part described in deed from William Campbell to J. B. McIntosh et al, which deed is recorded in Book 106 of Deeds, page 283 et seq., Nevada County Records.

Also Lot One (1) of the Northeast quarter of Section fifteen (15) and Lots one (1) and two (2) and five (5) of the Southwest quarter of Section eleven (11), Township fifteen (15) North, Range eight (8) East, M. D. M.

Also all water rights connected with said property taking water from Wolf Creek and conveying same to the said property.

Also all other property including all mining ground, lands and claims, including machinery, tools, fixtures and appurtenances, owned by the said party of the first part, or in which it may have any right, title or interest and including all property purchased or under contract of purchase from George Campbell, or others, and

First: The Slate Ledge Quartz Mine, designated on the official plats of the United States as Lot. No. 39 in Section Ten, Township Fifteen North, Range Eight East, M. D. M., fully described in the United States Patent issued to the Slate Ledge Mining Company on May 6, 1873, recorded in Book One of Patents, page 23, records of Nevada County, California, which is especially referred to and made a part hereof for a particular description of said premises. Excepting therefrom that portion of said land conveyed to Joseph Weisbein and Jacob Weisbein by deed dated July 25th, 1910.

Second: That certain portion of the northwest quarter of the Northeast quarter of Section Fifteen, Township 15 North, Range Eight East, M. D. M., described as follows, to-wit: Commencing at a wire nail in a nine inch leaning spruce tree on said hill south of Wolf Creek, nearly opposite grantors mill, thence S. 64° 5' W. (mag. var. 18° E.) at 183 feet cross ditch at 280 feet center of road 980 feet by southwest corner on south bank of Wolf Creek an iron pipe from which a ten inch maple tree bears North 46° East 7.3 feet distant and an alder bears North 72½° West 3.2 feet distant; thence North 2° West (at 45 center of Wolf Creek about 30 feet Westerly from the mouth of Poormans Ravine 200 feet center of road) 291.7 feet to the Northwest corner an iron wedge driven in rock in center of Poorman's Ravine; thence North 64° 05' East (at 175 feet cross old road 750 feet opposite Northeast corner of mill 875 feet center of Wolf Creek) 980 feet to the northeast corner an iron pipe on hillside, from which an 18 inch black oak bears South 29° West 25.5 feet; thence South 2° East (at 165 feet cross tunnel) 291.7 feet to place of beginning, containing six acres.

Third: Also the following described parcel of land situated in Nevada County, State of California, and more particularly described as follows to-wit:

Commencing at a leaning spruce tree, 8" in diameter at the southeast corner of the N. Y. G. V. mill site on Section 15, Township 15 North, Range 8 East, M. D. M. Nevada County, California; thence 790 feet in a westerly direction to a stake on the south line of said mill site; thence south easterly 245 feet to a stake at corner of fence on Water ditch running south and bearing southerly from a black oak tree, 8" id diameter, marked B. T. 8 feet; thence 790 feet northeasterly to place of beginning.

Said piece or parcel of land is known and designated as the "Cyanide Plant Tract" and contains two and one-fifths (2 1-5) acres, Reserving, however, from the operation of this indenture, the right to maintain and use existing ditches and roads around said premises.

Fourth: All the minerals and mineral bearing ore and material lying beneath the surface of the southwest quarter of the southeast quarter of and southeast quarter of the southwest quarter of Section Ten, the northwest quarter of the northeast quarter and the northwest quarter and the north half of the southwest quarter of Section fifteen and the east half of Section sixteen, all in Township fifteen north, range eight east, M. D. M. save and except any and all placer deposits thereon, with the right to enter upon any portion of the unoccupied or uncultivated portion of said lands and prospect, mine and develop the same and remove ores, minerals and precious metals and ore bearing materials therefrom. Also the right to occupy and use any portion of the cultivated lands, save such as will interfere with the safe and comfortable enjoyment of the dwellings, barns, corrals and outbuildings on said premises when necessary and requisite in mining said premises upon first designating the land wanted.

Fifth: All rights which the party of the first part may own, have or possess, or which said "Prudential Gold Mining Co" may have, own or possess, in and to the use of the waters of Wolf Creek, on or across or adjacent to any of the property hereinbefore described.

Also all other property, including all mining grounds, lands and claims, including machinery, tools, fixtures and appurtenances owned by the party of the first part or in which it may have any right, title or interest and all property hereafter acquired, a partial list of said personal property is hereto annexed, marked Schedule A and hereby made a part hereof.

Sixth: Central Consolidated Quartz Lode Mining Claim, patented, designated by the surveyor General as Lot Number Eighty-eight (88), embracing a portion of Section Twenty-eight (28) Township Sixteen (16) North, Range Nine (9) East, Mount Diablo Meridian, in the Greenhorn Mining District and more particularly described in the patent thereto dated March 11, 1892, and recorded on June 27, 1892, in Book 3 of Patents at page 123, records of Nevada County, California, and found in the Recorder's Office of said County, to which patent and record reference is hereby specifically made for a more particular description thereof.

Seventh: All of that certain piece or parcel of mining ground situate in Section Twenty-one (21) Township Sixteen (16) North, Range Nine (9) East, Mount Diablo Meridian in Greenhorn Mining District, Nevada County California, described as follows:

Commencing at stake Number One (1) on the section line between Sections Twenty-one and Twenty-eight, five hundred and thirty one (531) feet westerly from the quarter section corner between said sections; thence easterly along said Section line six hundred and sixty-seven (667) feet to a stake marked Corner No. 2; thence North twenty-six (26) degrees thirty-five minutes (35') West sixteen hundred and forty-five (1645) feet to a stake marked Corner No. 3; thence South sixty-three degrees twenty-five minutes (63° 25') West six hundred (600) feet to a stake marked Corner No. 4; thence South 26° 35' East thirteen hundred and fifty-five (1355) feet to place of beginning, magnetic variation 18° 30' East and containing twenty and sixty-six hundredths acres more or less.

Also the right to follow down on their dips and angles under the adjoining ground hereto all veins and lodes of quartz bearing gold or silver, the apex of which drop out or underlie the ground herein described, and to mine the same.

Also the right of way for a ditch or aqueduct through and over the land of W. H. Jennings from the reservoir of the South Yuba Water Company to the mining ground above described, said ditch not to have a greater capacity than that of flowing two hundred inches of water miners measure, the said right of way being identical with that conveyed by W. H. Jennings to George D. McLean and by said George D. McLean, through mesne conveyances, said conveyances being subject to certain reservations contained in said deeds above referred to. Said parcel No. 2 or Second being the same property described in a deed from said George D. McLean to the grantor of the Central Consolidated Mining Company, a corporation, dated December 29, 1896, and recorded on January 25th, 1897, in Book 88 of Deeds at page 231, records of Nevada County, California, to be found in the Recorder's office of said County and to which deed and record reference is hereby specifically made.

Eighth: All and singular the minerals, ores, mineral bearing gravel, rock and earth lying and being within all that portion of the Southwest quarter of Section fifteen, Township Sixteen North, Range Nine East, M. D. M. lying westerly and northerly of the Banner Hill Road. All of the South East Quarter of Section Sixteen (16): the North half, the East half of the South West quarter and the West half of the South east quarter of Section twenty-one, all in the Township Sixteen (16) North, Range Nine (9) East aforesaid; also that portion of the North West quarter of Section Twenty eight, Township Sixteen North, Range Nine East, M. D. M. known as the McDonald purchase, and dated February 8, 1909.

Nineth: All and singular the Assisi Quartz Lode Mining Claim, designated on the United States Official Plats and Surveys as Lot No. Eighty-nine (89) in Section Twenty-eight (28) Township Sixteen (16) North, Range Nine (9) East, Mount Diablo Base and Meridian, as described in the United States Patent therefor, issued to S. B. Fowler, and which is of record in the office of the Country Recorder of Nevada County, California, which is expressly referred to and made a part hereof for a more particular description on said premises; also the Dailey Quartz Mine situate in Section Twenty-eight (28) Township Sixteen (16) North, Range Nine (9) East, M. D. B. M.

Tenth: The North East quarter of the North East Quarter and Lots One and Two of Section Twenty-eight (28) in Township Sixteen (16) North, Range Nine (9) East, Mount Diablo Base and Meridian.

Eleventh: Lots Three and Four of Section Twenty-eight (28) Township Sixteen (16) North, Range Nine (9) East, Mount Diablo Base and Meridian, containing forty six and fifty-one-hundredths (46.50) acres.

Twelfth: Quartz Mining Claim designated as Lot 56 in Section Sixteen (16), Township Sixteen (16) North, Range Nine (9) East, Mount Diablo Base and Meridian, containing 30 91-100 acres.

Thirteenth: Forty-five (45) acres of land in South half of the South West quarter of Section Sixteen (16), Township Sixteen (16) North, Range Nine (9) East, Mount Diablo Base and Meridian in which is included the Quartz Mining Claim known as the South Extension of the Banner Quartz Mine.

Together with all and singular the tenements, hereditaments and appurtenances thereunto belonging, and the rents, issues and profits thereof.

Public notice is hereby given that **on Monday, the 25th day of June,** 1928, at 10 o'clock A. M. of that day, at the front door of the Courthouse of said County of Nevada, in the City of Nevada, in said County and State, I will, in obedience to said order of sale and decree of foreclosure and sale, sell the above described property, or so much thereof as may be necessary to satisfy said judgment with interest and costs and expenses of sale, to the highest bidder and best bidder for cash, in lawful money of the United States.

Dated, May 28th, 1928.

A. W. HOGE,
Commissioner appointed by said Superior Court.

W. E. WRIGHT,
Attorney for Plaintiffs.

Back of your Telephone

TELEPHONE service is essentially a community enterprise backed by national experience.

Almost every community on the Pacific Coast has at least one telephone exchange. And each exchange has its staff of home town folks—men and women who are your neighbors, who attend the same clubs and social gatherings, patronize the same stores and daily assume their responsibilities as interested citizens of the place where they live and serve.

Back of your telephone too is the cumulative experience of half a century of research and development—continuous and concentrated effort to improve the telephone art. Thus from the Bell Laboratories and all of the twenty-four operating companies of the Bell System, telephone service in every community benefits by new inventions and the discovery of better ways to do things—all making for the highest standards in telephony now known.

IVAN PARKER ANNOUNCES HIS SENATORIAL CANDIDACY

Standing upon a platform of strict economy in the administration of State and County Government, former Assemblyman Ivan H. Parker of Auburn, will submit his name at the August Primaries seeking the Republican nomination for State Senator from this district.

Parker was for six years a member of the California Legislature. He is seeking to return and fulfill his ambition to represent his district in the California Senate.

Serving in the Assembly of the California Legislature during the sessions of 1917, 1919 and 1921, Parker rose to the Chairmanship of the Committee on Agriculture. He was also a member of the following committees: Federal Relations, Public Utilities, Irrigation, Conservation, Mnes and Mining and Roads and Highways. His untiring efforts in conjunction with his colleagues in bringing to success the Mother Lode Highway bill received generous praise. This State Road from Auburn through El Dorado County to Sonora, is 127 miles in length and connects the county seat towns of five counties.

The early life of Parker was spent on a farm, and from there as a boy he walked to town daily and learned the printer's trade.

Parker has been a resident of Placer County for the past thirty-eight years. He was employed for two years by F. M. Millikan as editor of the Auburn Republican (now Journal-Republican.) He then engaged in newspaper work as owner and publisher of the Sentinel at Colfax, California, until his election as Auditor and Recorder of Placer County in 1902, serving three terms.

In 1916 Parker was elected to the Assembly and served for three sessions as the representative from the Ninth Distirct, comprising the counties of Placer and Nevada.

Among other positions of trust and Nevada.

Among other positions of trust and honor that Parker has been called upon to fill are the following: Secretary of the Placer County Board of Trade, Secretary Placer County Miners' Association, Field Deputy California State Mining Bureau, Supervisor Third District of Placer County, delegate to the National Republican Convention held in Chicago in June 1920.

The record of Ivan H. Parker in the Assembly of the California Legislature is a good one, and should he succeed in his ambition, he is well fitted to represent the people of this Senatorial District.

Joe Pomere of Berkeley is here visiting old time friends.

Judge Raglan Tuttle was called to San Francisco this week to act as a witness in superior court at that place.

Mr. and Mrs. A. Anderson of Spencerville wer eSunday visitors at the home of her sister, Mrs. E. M. Austin, of this city.

Ellsworth Colley of Tudor spent a few days here visiting his father, J. F. Colley.

Mr. and Mrs. Frank Guenther are hame after spending their vacation around the bay.

AN APPRECIATION

We wish to thank those who assisted in making our recent dance such a success at North San Juan, and we wish to thank especially the ladies who brought cakes and other edibles for the cafeteria.

Sam McCullough,
Chairman, San Juan Ridge Waters Users Association.

MRS. LOCKLIN ENTERTAINS MEMBERS OF GUILD

Mrs. Antha Locklin proved a delightful hostess to the St. Agnes Guild Thursday afternoon. After the interesting business meeting was over dainty refreshments were served to a number of ladies present. A lavender color scheme was carried out in the decorations and prettily appointed table.

This will be the last meeting of the Guild for the summer and they will resume the first Thursday in September.

.....P. G. Scadden
Awarding of Hauber Scholarship .....
.....P. G. Scadden
High School Orchestra, ...
.....Miss O'Neil, Director

LAST OBSEQUIES GIVEN OVER REMAINS OF PED

(An epitaph)

Here lies our darling PED child,
It neither laughs nor hollers,
It lived not many months
And cost the District many dollars.

The remains of the PED cheeild, beloved of the promoters of a scheme to play with the finances of the Nevada Irrigation District, were interred in the potter's field Saturday after the last rites had been performed. Only a few paid mourners were present for the obsequies and the child, conceived out of wedlock and nurtured in secret by the directors of the NID, was a sickly youngster from the start and despite frantic endeavors of its parents, died an early and timely death.

Commenting on the action, general manager Andy Gump, issued the following statement: "Our brain child has passed on. She languished because she was misunderstood of the people. She would have done wonders for us promoters had she been permitted to live but her physicians, Doctors Mulcahey and Schwartz, used the lancet too freely in vital spots and drew too much life blood from her emaciated body. Requiescat in pace. Amen and amen."

VICTOR GATES PASSES

Victor C. Gates passed away Friday evening at the family home near Sugar Loaf, heart failure being presumed to be the cause of death. He was a native of Nevada City, being born in 1860.

The funeral services are being held this afternoon from the Holmes Funeral Home. Thre sons, Victor and Robert of this city and Cedric of Sacramento and a daughter, Mrs. Marceline Fischer of New York survive.

MRS. ELLA SCHROEDER DEAD

Mrs. Ella Schroder of the Gold Flat section passed away Friday evening in a Sacramento hosptial. The runeral services were held in Sacramento today.

Harry Rowe, of the firm of Schwabacher & Co., of Sacramento was calling on old time friends here Sunday.

The smooth top on the new Gas Range keeps cooking utensils clean

When you are in your kitchen you put on an apron, even if your kitchen is spotlessly clean.

Gas is a clean fuel. However, a smooth top is built into the new Gas Range to give you added cleanliness.

The smooth top protects the gas burners from food that would otherwise boil over onto the burners. For clean burners mean clean heat. The smooth top distributes heat evenly and one burner keeps several vessels boiling. It sends products of combustion up the flue.

See the new Gas Range with the smooth top built into the range for added cleanliness. Enjoy this range's fine cooking.
